

Cremone Bolt Specification Form

In order to better serve you, we ask that you provide as much information on your cremone application as possible.

Measurements must be exact, photos with measuring implements will not be accepted

1. Specify cremone style and locking/non-locking: _____
2. Specify desired lever/knob: _____
3. Specify opening size: _____
4. Lever height from bottom of door: _____
5. Stile width for mounting: _____
6. Top strike style required: _____
7. Bottom strike style required: _____

NOTE: Typical cremone sets are one-sided, and traditionally used on the interior side of patio doors with no entry from the exterior. If you need active, fixed (dummy), or keyed levers on the exterior, or if you are utilizing cremones for decorative millwork and cabinetry, please let us know so that we can assist with coordinating the most functional options.
